NAIL COATINGS GUIDE

BRIGHT FINISH

- ▶ Uncoated steel intended for interior applications where corrosion resistance is not required

PHOSPHATE COATED

- ▶ Reduces friction when driven and provides a surface that bonds well with joint compound and paint
- ▶ Intended for interior applications where corrosion resistance is not required

HOT DIPPED GALVANIZED

- ▶ A hot tumbling or hot-dipped process with zinc on the fastener's surface
- ▶ Better corrosion resistance

ELECTRO GALVANIZED

- ▶ An electronic process that coats nails with a thin layer of zinc
- ▶ Typically used in areas where less corrosion protection is needed such as roofing applications
